OrangeHRM

Team Members:

1. Aya Helmy Mohamed Elkamash
2. Omar Hazem saed
3. Tasnim Ibrahim Ibrahim
4. Mohamed zaki mohamed
5. Momen mohamed abd allah
6. Abd el Rahman mohamed Ibrahim aldesoky

Project Objectives:

- Manual Testing: Identify functional defects, usability issues, and edge cases in core HR operations.

- Automation Testing: Implement automated test scripts using Selenium/Pytest to streamline regression testing.

- Performance Testing: Conduct load and stress testing using JMeter to analyze system behavior under high traffic.

- API Testing: Validate API functionality, response times, and security using Postman or RestAssured.

This project will help improve software quality and provide valuable insights into testing enterprise applications, making it a great learning experience for the team.
